Lift and Slide

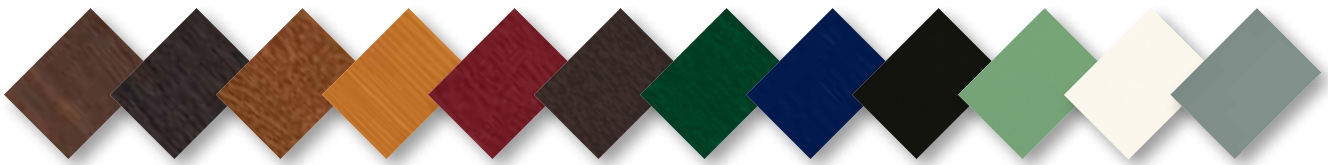

KÖMMERLING®

PremiDoor Lift and Slide

- 1 Low line gaskets and weatherseals provide lasting performance and slimmer sightlines.
- 2 Single leg glazing bead is highly secure and easy to install on sight.
- 3 Reliable functionality, great handling and smooth and quiet running of the sliding sashes.
- 4 Extraordinary measurements: sash sizes up to 3.0m wide and 2.5m high. Up to 4 sashes.
- 5 All PVCu profiles are extruded in our exclusive lead-free Greenline compound.
- 6 Outstanding thermal insulation threshold with thermal break for optimal isothermal properties.

Now available in over 40 colours.

► Innovation and Energy Efficiency

Like all of our window and door systems, the lift and slide PremiDoor is packed full of features. It's designed to let in more light in large openings than a typical bi-folding door and makes for an impressive entrance. It's also been proven across Europe to withstand the harshest climatic conditions.

Kömmerling and parent company, profine Group, also lead the way across Europe with their lead-free Greenline compound that was developed 7 years ago. In the UK many Systems Companies still use lead as a stabiliser in their PVCu compound. At profine, we understand the importance of the environment in terms of harmful materials and energy efficiency.
